	Smart Phone App Available	X	X	X	X
Warranty (years)		2	3	2	2
Additional Information		Waterless humidification with HME (heat-moisture exchanger); includes Qtube muffler to reduce noise along with quieter motor which has resulted in 29% reduction in static and dynamic noise as compared to the Z1.	Featuring the PureView Algorithm, the IntelliPAP 2 offers improved sensitivity (compared to its predecessor Intellipap CPAP) to a full spectrum of patient events to provide a therapy experience based on the patient's natural breathing pattern. Equipped with PulseDose Heated Humidification to manage rainout in the tubing by providing humidified air during inhalation and dry air during exhalation. The IntelliPAP 2 features Bluetooth connectivity to allow the patient to view and transmit therapy data. It is approved for airline use with a Drive DeVilbiss External Battery.	DreamStation Go is a discreet, slim-profile device that weighs less than 2 pounds and features a built-in power supply that helps to limit the number of components to pack. Philips' new 12 mm micro-flexible tubing continues the compact trend across the holistic system, minimizing bulk while improving mobility and comfort. DreamStation Go meets FAA standards for in-flight use, so users can keep up with therapy even when taking an extended or red-eye flight.	3 modes in 1: CPAP, APAP, and ResMed's exclusive "AutoSet for Her" to address female-specific symptoms in mild to moderate OSA.
